

1. How does character-oriented Value Education effectively instil ethnic values in an individual's psyche and actions?
 1. Character-oriented Value Education instils ethnic values through strict rules and punishment.
 2. Character-oriented Value Education teaches ethnic values through stories and real-life examples.
 3. Character-oriented Value Education instils ethnic values by promoting self-reflection and personal growth.
 4. Character-oriented Value Education instils ethnic values by integrating them into daily life and actions.

2. How do mental qualities like self-control and interpersonal qualities like tolerance promote the state of inner peace?
 1. Mental qualities promote physical well-being while tolerance helps in social interactions.
 2. Self-control regulates emotions and tolerance leads to better relationships and calmness.
 3. Tolerance helps in anger management and self-control is necessary for good physical health.
 4. Self-control is necessary for career growth and tolerance helps in community development.

3. How does Value Education enable individuals to comprehend what is truly valuable for enduring human happiness?
 1. Value Education teaches individuals to prioritize material wealth for happiness.
 2. Value Education helps individuals understand the importance of relationships and personal growth.
 3. Value Education enables individuals to identify and cultivate core values for a fulfilling life.
 4. Value Education focuses on academic achievement as the key to happiness.

4. Can values be universally applicable if shaped by diverse cultural and historical contexts of human existence?
 1. Values can't be universally applicable due to diverse cultural and historical contexts.
 2. Cultural and historical contexts don't influence values, making them universally applicable.
 3. Values can be universally applicable if they transcend cultural and historical contexts.
 4. Universal values are impossible due to the ever-changing nature of human existence.

5. Can universally applicable truth be subjective, and if so, does it compromise its natural verifiability?
 1. Universally applicable truth can be subjective and still maintain natural verifiability through personal experiences.
 2. Subjective truth cannot be universally applicable as it varies from person to person and context.
 3. Natural verifiability requires objective evidence, making subjective truth incompatible with universality.
 4. Universally applicable truth must be objective to ensure natural verifiability and consistency.

6. How can values be considered rational if they are influenced by personal experiences and emotions invariably?
 1. Values can't be rational as personal experiences and emotions are subjective and irrational.
 2. Rational values are based on objective principles, not personal experiences and emotions.
 3. Values can be rational when personal experiences and emotions are critically evaluated and reflected upon.
 4. Rational values are those that are universally accepted, regardless of personal experiences and emotions.

How does love expressed through compassion, kindness, and empathy facilitate mutual fulfilment in human relationships?

1. Love expressed through actions brings people together in mutual respect and understanding always.
 2. Compassion, kindness, and empathy help people understand and support each other's needs and feelings.
 3. Love expressed through material gifts brings people joy and happiness in relationships always.
 4. Compassion and kindness are essential for personal growth, but not necessarily for mutual fulfilment.
-
8. Can values that contradict human instincts ever be considered naturally acceptable and experientially verifiable principles?
 1. Values opposing human instincts can still be naturally acceptable with conditioning.
 2. Values contradicting instincts are naturally unacceptable and can't be experientially verified.
 3. Values that contradict human instincts can be naturally acceptable with social norms.
 4. Values opposing human instincts require evidence to be considered naturally acceptable principles.
-
9. How does the value of universal love promote non-violence and compassion towards all living beings equally?
 1. Universal love promotes non-violence by prioritizing self-love over love for all beings.
 2. Universal love promotes non-violence by encouraging love only for those who are kind.
 3. Universal love promotes non-violence by loving all beings equally and unconditionally.
 4. Universal love promotes non-violence by excluding those who are violent.
-
10. How does Value Education facilitate harmonious living among individuals, societies, and the natural world simultaneously?
 1. Value Education promotes harmony by focusing solely on individual well-being and prosperity.
 2. Value Education facilitates harmony by recognizing the importance of sectarian differences and diversity.

 4. Value Education achieves harmony by enforcing strict moral codes and dogmatic principles.
-
11. What encompasses the scope of Value Education to understand human reality and harmonious existence in nature?
 1. The scope of Value Education encompasses only individual and societal levels of human living.
 2. The scope of Value Education covers thought, behaviour, and realisation of human beings only.
 3. The scope of Value Education includes understanding of human aspirations and innate interconnectedness.
 4. The scope of Value Education encompasses all dimensions and levels of human living and existence.
-
12. How does a piece of chalk derive value through its participation in educational activities universally?
 1. A piece of chalk derives value through its universal use in educational activities worldwide.
 2. The chalk's value is limited to specific educational institutions and their curricula.
 3. Chalk's value is determined by its monetary worth in the market economy globally.
 4. The value of chalk is solely derived from its chemical composition and physical properties.

13. What are the fundamental core values essential for a harmonious human society and individual well-being universally?
 1. Respect, honesty, and kindness are essential for individual well-being universally always
 2. Right Conduct, Peace, Truth, Love, and Non-violence are core values for harmonious society
 3. Self-discipline, responsibility, and self-awareness are fundamental human values for well-being
 4. Perseverance, hard work, and determination are essential core values for individual success

14. How can self-exploration process in Value Education empower students to discover innate human values independently?
 1. Self-exploration process empowers students to discover values through teacher's guidance and lectures.
 2. Students can discover innate human values independently through self-reflection and inner dialogue.
 3. Value Education should focus on imparting moral values through storytelling and examples.
 4. Self-exploration process involves learning from others' experiences and feedback to discover human values.

15. How do values guide the application of skills in achieving personal and societal harmony effectively?
 1. Values guide skills application by prioritizing 'what to do' over 'how to do' for harmony.
 2. Skills are the primary focus, and values are secondary in achieving personal and societal harmony.
 3. Values and skills are mutually exclusive, and harmony can be achieved through skills alone.
 4. Personal and societal harmony can be achieved through values or skills, interchangeably.

16. How do universal values of self-discipline and responsibility influence right conduct in personal and social contexts?
 1. Universal values promote harmony by setting boundaries and respecting others' rights.
 2. Self-discipline and responsibility lead to personal growth, but not necessarily social responsibility.
 3. Universal values of self-discipline and responsibility guide right conduct by promoting self-awareness, accountability, and respect for others.
 4. Self-discipline and responsibility are only relevant in personal contexts, not social ones.

17. How do our deep-seated beliefs influence the formation and pursuit of our life's aspirations and goals?
 1. Our deep-seated beliefs hinder the formation of life's aspirations and goals completely.
 2. Deep-seated beliefs have no impact on the formation and pursuit of life's aspirations and goals.
 3. Our deep-seated beliefs shape and guide the formation and pursuit of life's aspirations and goals.
 4. Deep-seated beliefs are the only factor in the formation and pursuit of life's aspirations and goals.

18. How can a teacher initiate a dialogue to facilitate self-exploration in value education effectively?
 1. Teacher should give sermons and tell students what values are right or wrong.
 2. Teacher should start a dialogue by asking open-ended questions to encourage critical thinking.
 3. Teacher should provide a list of values and ask students to memorize them.
 4. Teacher should show videos and documentaries to demonstrate different values.
